

# Jennie Huang

I'm a web developer with good communication skills, and a strong work ethic. I like to solve problems in different ways, and challenge myself to do better.  
Originally from Taiwan.

## PROJECTS

### Co-Edit

Links: [Website](#) / [Github](#)

Co-Edit is a WYSIWYG editor that allows you to co-edit the same document with others online in real-time.

- Users can sign in locally or use Google OAuth 2.0.
- User authentication with Json Web Token.
- Use socket.io for real time co-editing.
- Differentiate every user with different colors in the editor.
- Responsive web design.
- Supports English and Chinese.
- Only the host can grant or remove access to your documents.
- Supports exporting your documents as PDF files.
- CI/CD pipeline with automated tests through Google cloud build and cloud pub/sub.
- Hosting images on firebase storage.
